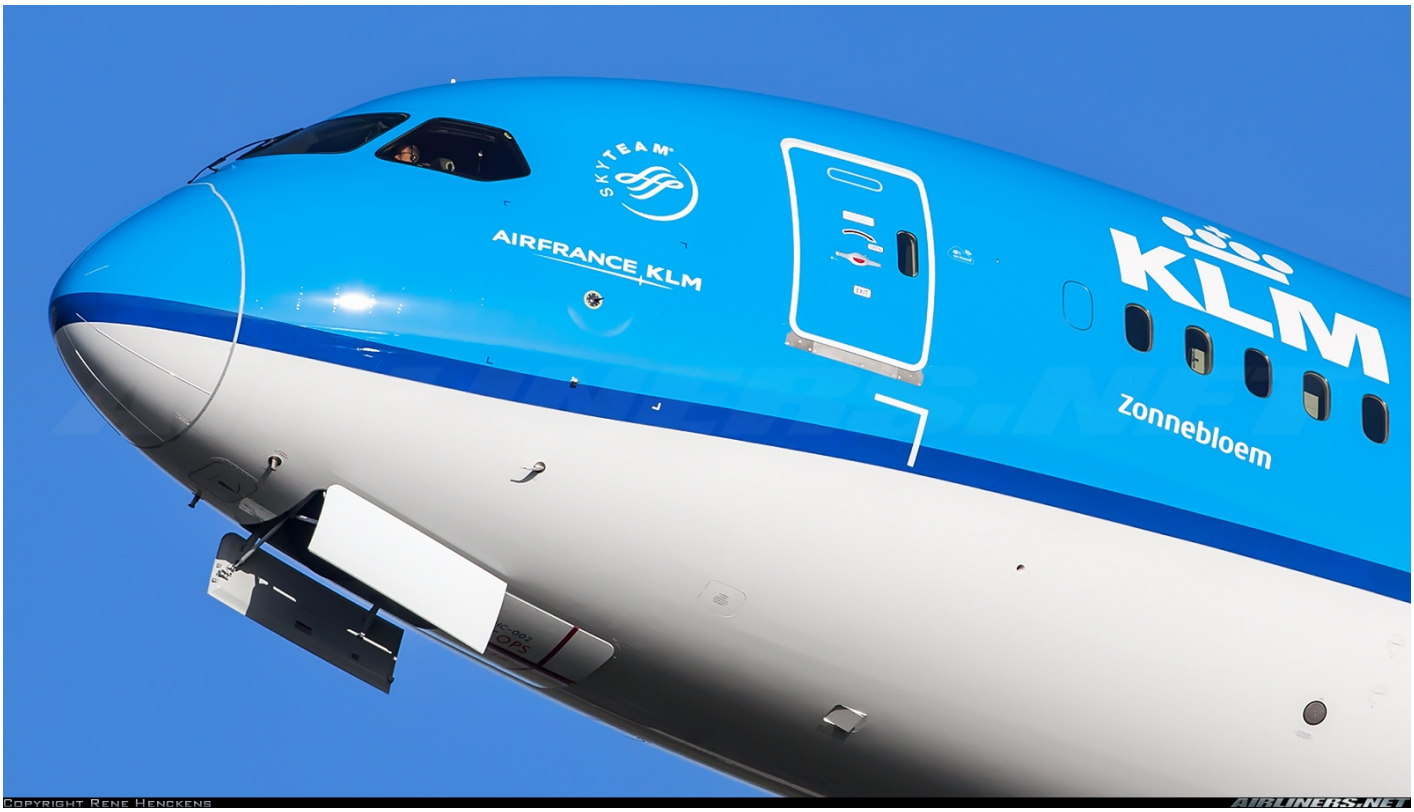
SAN FRANCISCO TO BECOME KLM'S FIRST U.S. BOEING 787 DESTINATION

News / Airports / Routes



KLM Royal Dutch Airlines will operate its Boeing 787-9 in a summer seasonal service from Amsterdam to San Francisco, starting from May 4.

The seasonal service will be in addition to KLM's daily scheduled flight operated by 747-400s, and it will mark the first deployment of the Dutch carrier of its 787-9s on a route to the United States.

The new flight schedule will see flight KL609 leaving Schiphol at 12:40 on Wednesdays and Sundays, and landing at San Francisco at 14:45 local time. Return flight will be flight KL610 leaving San Francisco at 16:45 on Wednesdays and Sundays as well and arriving to Amsterdam at 12:15 the following day, local time.

In the other direction, flight KL610 will depart SFO at 4:45 p.m. On Wednesdays and Sundays from May 4 and will arrive at AMS at 12:15 p.m. the following day, local time.

Eric Caron, General Manager, Air France-KLM in the USA said the addition of this new Dreamliner service "reflects our commitment to providing exceptional customer experiences through innovative design to deliver more comfort and connectivity onboard a faster, more fuel-efficient plane."

KLM introduced its first Dreamliner last November, and currently it serves Abu Dhabi, Chengdu,
