SMARTJET TO LAUNCH DIGITAL SOLUTION FOR FBOS AND MAINTENANCE SHOPS

News / Business aviation

SmartJet will shortly launch a dedicated solution for FBO's and maintenance workshops.

"In a world in which digital is at core of uses and business concerns, it seemed critical to offer to the business aviation market an innovative tool designed to simplify the lives of aircraft owners, operators and pilots." said Jodouin Mitrani, CEO, SmartJet.

SmartJet offers a new outlook to software. The application links the pilot to the passengers, the flight ops manager, the FBO's, the travel agents; all within the same interface.

The new application can use new technological framework like Google Angular JS or Boostrat front office language.

Currently in testing with several operators in France and Switzerland, the application will soon be on the market, launching in Europe first and then it will go international.
