ACC AVIATION EXTENDS PARTNERSHIP WITH FREEDOM II

News / Business aviation

ACC Aviation will remain an exclusive marketing and sales agent for Freedom II LLC-operated VIP Boeing B757-200. ACC Aviation was appointed by Freedom II LLC last summer to support their 62-business-seat VIP aircraft, with ensuite bedroom. The aircraft has since flown several high-profile artists and music bands since obtaining their AOC in 2022 and is set to embark on more tours around Europe this summer.

Phil Mathews, the CEO of ACC Aviation, commented: “We are delighted to continue working with Freedom II LLC. The aircraft has been well received by the air charter market. We had enquiries coming from multiple sectors, including music, sport, as well as operators and air charter brokers, who were seeking capacity to fulfil their global charter requests. This is a unique aircraft that can accommodate a range of air charter requests, and I am excited to follow how many countries VP-BBE will visit through the rest of this year and beyond. ”

Larry Gregg, Executive Vice President, Freedom II LLC, said: “Working with ACC Aviation has

been very smooth from the beginning. We needed a knowledgeable and trusted partner who could re-introduce the aircraft to the market, re-connecting it with the air charter industry. ACC team has delivered that for us. We are thrilled to see our B757 regularly flying, welcoming new and existing passengers on board.”

The B757 is one of Boeing’s most popular airframes, boasting impressive range and uplift capabilities, cruising speeds, and category-leading cabin comfort. This unique 62-seat configuration bridges the gap between private charter and scheduled services, providing a flexible transport solution for larger groups.
