DC AVIATION AL-FUTTAIM RECEIVES STAGE 2 IS-BAH CERTIFICATION

News / Business aviation

As further proof of its commitment to provide customers with the highest levels of service and safety, DC Aviation Al-Futtaim has received the International Standard for Business Aircraft Handling (IS-BAH) Stage 2 certification for its Fixed Base Operations (FBO) located at Dubai South.

DCAF had completed its Stage 1 certification in May 2019.

IS-BAH Stage 2 Certification is the second of three levels of the highest possible safety standards that an FBO can have. The certification is the global industry standard on safety management and risk mitigation for business aviation handlers.

The accreditation process involved a complete audit of DCAF's FBO safety management systems, emergency and security procedures, organisational structure, training protocols and operating procedures and was conducted by an independent auditor from the International Business Aviation Council (IBAC).

Commenting on the accreditation, Susan Bujtas, Director of Ground Operations at DC Aviation Al-Futtaim said, "The safety of our customers and employees remains our top

priority. It is an ongoing investment we make and is part and parcel of our DNA. The successful completion of the Stage 2 audit was a result of months of around-the-clock hard work from all the teams involved and the continuous support of the management. This certification further demonstrates our vision to provide customers with the highest levels of safety and service."

"The beautifully appointed DC Aviation Al-Futtaim VIP facility unquestionably upholds the same high standards of the wider DC Aviation Group," said Karen Hein-Jones who conducted the IS-BAH inspection audit. "The DC Aviation Al-Futtaim team should be very proud of their strong result which validates their commitment to their clients and safety – it is clear this organisation is handling aircraft to a very high standard in the UAE."
