Under the guidance of Mikhail Vasilenko in 2016 - 2017 the Sheremetyevo Airport proved to be a leader in reputable international ratings by service quality and accuracy of flights. Parallel to performing intense operating activities Sheremetyevo implements a broad-scale program of development and modernization to get ready for FIFA World Cup-2018.

In the setting of dynamic growth of passenger and cargo traffic the Sheremetyevo Airport is still one of the best airports in Europe by service quality. Thus, in 2016, Sheremetyevo set up a historical record in passenger traffic by handling 34,300,000 people and **took the first place in Europe by service quality in the category of airports with the traffic of 25-40 million people per year according to the ratings of ASQ by ACI. Besides, in the first part of the current year Sheremetyevo has become the most dynamic airport in Europe in the category of airports with the traffic of more than 25 million people per year.**

Sheremetyevo has established a reputation as an efficient, responsible and modern company. The publicity of the airport is supported with high media activity, communication with the expert community, regular provision of information about new services, development of a route network and stages of implementation of the development program to passengers, and prompt response to passenger requests in social media. The efficiency of the communications strategy of Sheremetyevo is the high citation index of experts of the airport and the highest indicators of “The Atmosphere at the Airport” that effected on getting key industry awards at year-end 2016.
