MOMENTUM VENTURES ENVISIONS A SUSTAINABLE FUTURE OF AVIATION WITH ELECTRIC AIRPLANES

News / Airlines

Momentum Ventures joins the global aviation community in celebrating the strides achieved in electric aviation. The company recognizes the profound potential of electric airplanes in reshaping the industry, ushering in a new era of air travel solutions that are both sustainable and environmentally friendly. The rise of electric aviation, exemplified by pioneering endeavors like Eviation Alice, marks a significant turning point in the perception and experience of air travel. According to The International Council on Clean Transportation, electric aircraft can provide a 49% to 88% reduction in CO2e emissions relative to fossil-fueled reference aircraft and can be 2.1 to 3.2 times more energy efficient during cruise.

Matt Keezer, CEO of Momentum Ventures, commented: "While we aren't engaged in electric airplane manufacturing, we enthusiastically welcome the positive influence they impart on the aviation sector. Electric airplanes harmonize with our core values of promoting sustainability and advancement within the travel industry. Collaboration across the industry is vital for maximizing the benefits of electric aviation. Momentum Ventures recognizes the importance of partnerships to

address challenges related to battery technology, infrastructure, and supply chains."

Electric airplanes hold the promise of substantially reducing carbon emissions and operational expenses, presenting a revolutionary answer for short-haul and regional flights. While Momentum Ventures predominantly operates within the flight and travel sector, its endorsement of sustainable practices also encompasses broader initiatives aimed at fostering beneficial transformations.

As FlightHub and JustFly.com continue to excel within their respective roles, Momentum Ventures remains dedicated to endorsing and supporting initiatives that contribute to a sustainable aviation future.
