ARGUS INTERNATIONAL ANNOUNCES TRAQPAK FBO GROUND TRACKING

News / Business aviation, Events / Festivals

ARGUS International announced he addition of ground tracking to their TRAQPak FBO software. This new addition to ARGUS' TRAQPak software provides real-time tracking on the ground, so subscribers know where an airplane is positioned at a particular airport. Ground tracking brings a sophisticated level of technology to FBOs around the world enhancing their ability to gain further visibility to their airport's operations. The ground tracking feature is also beneficial for service companies such as catering and ground transportation, and it provides additional real-time data for ramp workers by providing a better understanding of an aircraft's actual taxi time relative to their position at an airport.

Travis Kuhn, SVP of Market Intelligence with ARGUS International, commented: “Bringing our ground tracking to the marketplace has been an active collaboration between our customers and our TRAQPak team. I am proud to be a part of a team that continues to work tirelessly to meet and exceed the standard of service our industry expects. This new offering is the first of multiple changes we’ll be bringing to the marketplace as we move throughout 2023."

ARGUS International will be exhibiting at NBAA Schedulers and Dispatchers, on January 24-26, at booth #911 and will be available to discus TRAQPak FBO Ground Tracking as well as Business Aviation Audits, Software and Aviation Consulting.

22 JANUARY 2023
