BIZJETMOBILE SECURE SECOND NORTH AMERICAN FLEET

News / Business aviation

BizjetMobile announced City Jet Inc. as the second fleet operator in North America for CHiiMP Smart.

City Jet Inc.'s selection of CHiiMP Smart follows fleet installations from Emergency Airlift in North America and Jetfly in Europe after they committed their respective fleets to the revolutionary Bluetooth-based platform last year.

City Jet Inc. CEO Ron Mays said, "We are excited about the airborne access that BizjetMobile offers with such a cost conscious entry into text messaging and email. After looking at different options that were $100K and over, we decided that BizjetMobile was the best solution. We are looking forward to installing CHiiMP Smart in all our aircraft."

BizjetMobile Sales Director Ally McDougle said, “City Jet coming on-board affirms our belief that charter operators are looking to provide simple inflight connectivity for passengers and crew without breaking the bank.”

CHiiMP Smart is the only inflight connectivity system in the world that utilizes Bluetooth Smart technology and Iridium to simultaneously connect pilots and passengers with the outside world via voice, text, email and tracking services.

BizjetMobile is currently offering CHiiMP Smart to customers as an exclusive all-in-one package that includes the system, 12 months free text and email plus 500 minutes of voice. This transparent approach to inflight connectivity means everyone can stay connected for the entire flight without consuming expensive broadband. The result is that aircraft owners and operators avoid bill shock, which is often associated with inflight Wi-Fi.

BizjetMobile will be displaying CHiiMP Smart and its range of unique Bluetooth systems at EBACE
