XTI AIRCRAFT COMPANY TO EXHIBIT AT PARIS AIR SHOW

News / Events / Festivals, Manufacturer

XTI Aircraft Company (XTI) announced today it has been selected by the Paris Air Lab Programming Committee to exhibit at the Paris Air Show. The exhibit space is hosted by the French Aerospace Industries Association in coordination with Starburst Accelerator, a major aerospace, defense and security investment fund and consulting firm. In addition to exhibiting in the Concorde Hall with other early stage aerospace companies, XTI will be presenting its TriFan 600 aircraft to a group of investors, major industry, and media representatives during a dedicated session in the afternoon of June 20th at the show.

"We are delighted to be chosen by the Committee to exhibit and are grateful to our host for this opportunity to present our revolutionary new aircraft, the TriFan 600," said Robert LaBelle, XTI's Chief Executive Officer. "We look forward to interacting with our industry partners, investors and future customers throughout the show," said LaBelle.

LaBelle continued, "The invitation by our host to participate in the Paris Air Show is further validation that the market is recognizing the value proposition of our innovative aircraft, and its patented technology. The TriFan 600 will provide vertical takeoff combined with long-range, the speed and comfort of a business jet, and a quiet, clean state-of-the-art hybrid-electric propulsion

system. There's absolutely nothing comparable to the TriFan 600."

The TriFan 600 is a major breakthrough in aviation and air travel. The six-seat airplane will have the speed, range and comfort of a business jet and the ability to take off and land vertically, like a helicopter. It will travel at over 300 miles an hour, with a range of over 1,200 miles. Using three ducted fans, the TriFan lifts off vertically and then its two wing fans rotate forward for a seamless transition to cruise speed and its initial climb. It will reach 31,000 feet in just ten minutes and cruise to the destination as a highly efficient business aircraft.
