NEW RETAILER FOR TECNAM P2012 SERIES - GERMAN AIR ALLIANCE

News / Business aviation, Manufacturer

TECNAM announces their partnership with Air Alliance to market its ultimate twin engine Tecnam P2012 series for the sales territories in Germany and Austria. Air Alliance, in business since 1993, is a large group offering different aviation services: sales, charters, maintenance and flight training. The P2012 will be the first turbocharged twin piston aircraft in the Air Alliance portfolio and it will join the fleet of Jets and Turbo Props of other prominent brands on the market. With the TECNAM P2012 Air Alliance will benefit from the unique specifications of the aircraft, widening and enriching its offer to potential customers in the region.

Comfortably accommodating nine passengers with one or two crew members, the Traveller is a new-generation, piston-powered, twin-engine, high-wing, fixed-landing-gear aircraft. The P2012 provides a cost-effective solution with various configuration options, whilst always offering a travel experience that exceeds the category standards with features like air-conditioning, in-seat power, wide leg room, separated in-fuselage cargo bay, and under-seat storage space.

Cutting-edge avionics by Garmin offers pilots all the information they require for day and night operations in VFR, IFR and PBN; the “SPACE” cockpit has been specifically designed to reduce pilot workload, for a safer and smarter mission accomplishment. For all these features the aircraft can be operated by a Single Pilot and in all-weather conditions including Flight In Known Icing (FIKI).

The P2012 series offers also Special Mission, Full Cargo, Combi and Air Ambulance. See more details here.

A first P2012 Traveller with Airline configuration will be heading to Germany in the upcoming weeks as a demo for Germany/Austria territories.

“The P2012’s innovative design is ideal for regional airlines and smart operators” said Giovanni Pascale Langer, TECNAM Managing Director. “Aligning with Air Alliance, with its great experience in this market, it is a natural fit to provide German and Austrian customers with the support they need.”

“We are excited to begin this new partnership with Tecnam® “, said René Petersen – AIR ALLIANCE CEO. “We think the P2012 is the most modern piston engine of this category and it is the perfect fit to expand and complete our multi-brand offer”.

Outstanding service in General and Business Aviation has been the passion of Air Alliance GmbH for more than 25 years. Starting as a small maintenance company, Air Alliance has developed into a modern aviation service provider in General and Business Aviation. Today, Air Alliance holds outstanding positions in its markets within the business areas of aircraft maintenance, sale of new and used aircraft, aircraft operations (air ambulance, passenger and cargo) and flight schools.

Air Alliance Group has its headquarters in Burbach at Siegerland Airport (EDGS / SGE), an additional base at the airport of Cologne and an affiliated company in the UK. With 135 highly skilled staff in the entire group, Air Alliance is dedicated to support clients.
