VVIP FLIGHT - FIRST WINGMAN FBO IN INDIA

News / Business aviation

VVIP Flight has achieved the prestigious WYVERN Wingman FBO designation following a comprehensive audit conducted by WYVERN in December 2024. This certification sets a global safety benchmark, enabling air charter and private jet operators to confidently select their Ground Handler or FBO services while empowering Ground handling company/FBOs to demonstrate their adherence to the highest safety and operational standards.

Ms. Nisha Verma, CEO of VVIP Flight, commented: “Receiving the WYVERN Wingman FBO Certification is a testament to our unwavering focus on safety, service quality, and operational integrity. This achievement reinforces our position as a trusted partner for VVIP and private aviation needs. We remain committed to exceeding industry expectations and redefining excellence in general aviation services.”

WYVERN Wingman FBO certification is based on stringent evaluation criteria outlined in the Wingman Standard. This includes an in-depth focus on the Safety Management System, operational activities, the company’s safety and operational history, internal evaluation programs, and technical documentation.

Andy Day, Senior Vice President of Operations at WYVERN, commended VVIP Flight, stated: “We congratulate VVIP Flight for being the first organization in India and the second FBO worldwide to achieve Wingman FBO certification. This recognition validates their effective safety management system and excellence in managing ground operations and aircraft handling. Organizations achieving Wingman FBO certification stand apart by demonstrating their conformity to global best practices and allowing WYVERN to continually monitor their safety information.”
