ALBERTA COLLEGE OF AERONAUTICS SIGNS AGAIN WITH ALSIM FOR AN AL42 SIMULATOR

News / Maintenance / Trainings

Canada Alberta College of Aeronautics renews its confidence in ALSIM in acquiring an AL42 simulator. AL42 is an exact replica of the Diamond DA42, built using genuine aircraft parts and equipped with the authentic Garmin G1000 Nxi. It also comes with the latest generation image generator, GFC 700 autopilot, and a force feedback system that ensures increased realism. It can also be equipped with either analog or glass backup instruments. The AL42 model is designed for CPL IR/ME and PPL training in compliance with current regulatory standards of EASA FNPT II.

Lawrence LAU, Alberta College of Aeronautics's Accountable Executive, commented: "We have selected ALSIM for its flight simulation training solution for their robust and reliable flight training devices. The ALSIM ALX has proven an effective training platform for the iATPL diploma program and ACA is excited to add the AL42. The AL42 is the perfect complement to the Diamond DA42 training aircraft and will advance the efficiency and effectiveness of the College's Multi and IFR

training programs.”

Souleymane SARRÉ, Sales Manager at ALSIM, said: "We are delighted to expand our partnership with Alberta College of Aeronautics, with the addition of a second ALSIM training device to their fleet. We look forward to seeing the AL42 in operation and increasing the efficiency of ACA’s training programs. We would like to thank Lawrence and his team for the renewed confidence in our solutions."

Established as Cooking Lake Aviation in 1995, the Alberta College of Aeronautics is a Transport Canada Accredited Flight Training Unit certified fixed-wing aircraft training school. With the accreditation of the Integrated Airline Transport Pilot License diploma in 2023, CLA changed its name to the Alberta College of Aeronautics to reflect its focus on Collegiate Aviation Training programs. ACA offers a wide range of flight training programs, including the Integrated Airline Transport Pilot License Diploma Program, Commercial Pilot License Course, Instrument Rating Course, Night Rating Course, Private Pilot License Course and many more.
