LIEBHERR-AEROSPACE EXPANDS ITS MRO CAPABILITIES IN THE MIDDLE EAST

News / Maintenance / Trainings

Liebherr-Aerospace and Mohammed Bin Rashid Aerospace Hub (MBRAH), the aerospace platform of Dubai dedicated to the advancement of the aviation industry, signed an agreement for the new Liebherr Service Center at Dubai South during the MRO Middle East exhibition 2025 in Dubai.

Liebherr-Aerospace is enhancing its aftermarket service capacities with a new 2,400 m² facility, planned to be put into operation in early 2026. The new facility will cater to the Middle East's growing demand of aftermarket repair capacity for Liebherr products that are on board a wide variety of commercial aircraft, business jets and helicopters. The new facility will be an EASA Part 145 certified Service Center with focus on air management systems components repair.

Alex Vlielander, Chief Customer Officer at Liebherr-Aerospace & Transportation SAS commented: "The expansion of our MRO capacities is one of the key elements for continuous extension of our customer support and services portfolio in the Middle East region. It enables us to service more components in-house and in region, thus eliminating logistic routings and in parallel reducing turnaround times."

Tahnoon Saif, CEO of MBRAH said: “We are pleased to sign this agreement with Liebherr-Aerospace. This partnership underlines our position in attracting the top players in the aviation sector to establish their presence at Dubai South and operate in an integrated economic environment where they can connect with international markets. We will spare no effort in supporting their expansion endeavors, in line with our mandate to solidify and cement Dubai’s position on the world aviation map.”

Liebherr-Aerospace & Transportation SAS, headquartered in Toulouse (France), is one of 13 product segments of the Liebherr Group and a first-tier provider of on-board solutions in the aerospace and transportation industry, contributing to a more sustainable transport through innovative products, best in class services and performance excellence. The aerospace product portfolio offered to civil and defense customers includes environmental control and thermal management systems, flight control and actuation systems, landing gears as well as on-board electronics. For rail vehicles of all kinds Liebherr offers heating, ventilation and air conditioning systems, passive and active hydraulic systems for braking, damping, axle steering and levelling. Furthermore, Liebherr serves the commercial vehicle market with trailer cooling systems.

MBRAH offers global aerospace players high-level connectivity and is a free-zone destination for the world’s leading airlines, private jet companies, MROs, and associated industries. Located in and developed by Dubai South, MBRAH is also home to maintenance centres and training and education campuses. It seeks to strengthen engineering industries to foster the emirate’s vision of becoming a leading aviation hub.
