THREE CERTIFICATIONS TO CONFIRM QUALITY AND ENVIRONMENTAL STANDARDS - DEUTSCHE AIRCRAFT

News / Manufacturer

Deutsche Aircraft has obtained three certifications according to international standards. These confirm the commitment of Deutsche Aircraft of adhering to the highest international quality and environmental standards to ensure constant and sustainable growth. Recent audit results in accordance with EN 9100:2018 (former AS 9100D), including the requirements of EN ISO 9001:2015, enhances Deutsche Aircraft highest's quality management standards and brings valuable benefits to the company.

Receiving the EN ISO 14001:2015 environmental standards certification for the first time confirms Deutsche Aircraft's establishment and application to an Environmental Management System which covers design, production, maintenance and completion of the Dornier 328 Series Aircraft, including worldwide customer support and supply chain as well as management for operators.

The EN ISO certificates are world's highest and most recognized standard of quality and environmental management. They demonstrate Deutsche Aircraft's commitments to continuously

improving its quality performance while reducing the environmental footprint of its operations and services, as well as taking concrete action to combat climate change.

Confirming company-wide state of the art management systems

Along with its compliance to the current regulations for health protection and occupational safety, Deutsche Aircraft is committing towards stronger environmental goals and objectives. Deutsche Aircraft also takes one step ahead by placing a more rigorous attention upon its suppliers and partners' selection and is aiming to develop more sustainability-driven processes with higher efficiency and cost savings.

Dave Jackson, Managing Director of Deutsche Aircraft, said: "We are very proud to have been awarded with these three certifications. It is a reward for the team, confirming the outstanding work we have put into our internal processes to meet global standards and better support the ongoing development of the D328eco™. Our mission is to use the D328eco to drive aviation's transition to more sustainable flights. This goes hand in hand with consequent health protection and occupational safety."

Deutsche Aircraft fully commits to United Nations Sustainable Development Goals

As a purpose-driven OEM, Deutsche Aircraft is committed to operating as a responsible business by aligning its strategy with the United Nations Sustainable Development Goals (SDGs). Those are part of a global effort to change the corporate strategy and to support customers' efforts into more environmentally focused strategies to help companies reduce their environmental impact. This includes all aspects of quality management and customer satisfaction, as well as detailed and rigorously enforced health, safety and environmental protocols throughout the organisation.

To meet these requirements and improve performance, Deutsche Aircraft regularly provides comprehensive internal training opportunities for all employees to ensure that all departments comply with the latest health, safety and environmental standards. More than a year ago, Deutsche Aircraft also established a dedicated "Sustainability Team" to support the efforts of aligning with these processes both internally and externally.
