CONGO AIRWAYS ORDERS TWO EMBRAER E175 JETS

News / Airlines, Manufacturer

Congo Airways signed a firm order for two Embraer E175 aircraft, with purchase rights for a further two. The deal has a total value of USD 194.4 million at current list prices with all purchase rights exercised, and will be added to Embraer's 2019 fourth quarter backlog.

Desire Bantu, CEO of Congo Airways said, "These new jets will replace our current turboprop offering and allow us to serve routes both within the Democratic Republic of Congo, and regionally to West, Central, and Southern Africa, from our hub in Kinshasa. We will now have the flexibility and the right sized aircraft to serve our market, which is growing so rapidly an additional order may be required, for which the E2 is a particularly compelling option."

Raul Villaron, Vice President Sales, Africa and Middle East, Embraer Commercial Aviation, said, "It's great to welcome another airline to the Embraer family of operators, especially in Africa where the demand for regional travel is growing strongly. We look forward to supporting Congo Airways as they continue to upgrade their offering to their customers."

The aircraft will be configured in a dual class layout seating 76 passengers in total, with 12 in business class. Deliveries will begin in the fourth quarter of 2020.

Embraer is the world's leading manufacturer of commercial aircraft up to 150 seats with more than

100 customers across the world. For the E-Jets program alone, Embraer has logged more than 1,800 orders and 1,500 aircraft have been delivered. Today, E-Jets are flying in the fleets of 80 customers in 50 countries. The versatile 70 to 150-seat family is flying with low-cost airlines as well as with regional and mainline network carriers.
