EXECUJET MRO SERVICES BELGIUM RECEIVES US FAA APPROVAL

News / Business aviation, Maintenance / Trainings

ExecuJet MRO Services Belgium has received approval from the US FAA to perform line maintenance, AOG support and base maintenance on US-registered (N-registered) business aircraft. This approval complements the company's existing European Aviation Safety Agency (EASA) Part 145 certification, further expanding its international certifications.

Matthijs Hutsebaut, Regional Vice President for Europe at ExecuJet MRO Services commented: "A significant number of US-registered aircraft operate in or transit through Europe, requiring line maintenance and AOG support. This FAA approval is an important milestone that enables us to grow these services and expand our access to the US business aviation market.This approval enhances our reputation and reinforces our position as a trusted MRO partner in Europe and beyond."

Under the FAA approval, ExecuJet MRO Services Belgium is authorized to perform line maintenance on: Bombardier Challenger 300/350, Global 5000/5500, Global 6000/6500 aircraft; line and base maintenance of Cessna Citation 560 XL/XLS and Citation 525, 525A, 525B and 525C aircraft. The US regulator has also approved it to provide base maintenance up to C checks on Falcon 7X, Falcon 8X, Falcon 9000EX EASy/ DX/LX, and Falcon 2000 EX EASy/DX aircraft.
