ACS AVIATION CONTINUE TO GROW WITH ACQUISITION OF TWO ALSIM FLIGHT SIMULATORS

News / Maintenance / Trainings

ACS Aviation is now in possession of three certified ALSIM simulators. Both their second AL42, as well as their ALX, are now successfully qualified, respectively as FNPT II and FNPT II MCC by the United Kingdom Civil Aviation Authority. AL42 is an exact replica of the Diamond DA42, built using genuine aircraft parts and equipped with the latest real-world Garmin G1000 avionics suite. It also comes with the latest generation visual system, KAP140 autopilot and PBN/LPV capabilities.

ALSIM ALX provides up to four classes of aircraft from single-engine piston, twin engine piston, twin turbine up to medium category twin jet. The device is designed and approved for Advanced Pilot Training and Multi Crew Training in compliance with all current regulatory standards. The ALX offers advanced technology simulation equipment tailored to all specific training requirements. In addition, it has a proven track record for cost-effectiveness and helps save numerous aircraft hours. The ALX will be used by ACS Aviation for airline simulator assessments, command training,

Airline Pilot Standard (APS), Multi Crew Cooperation and Jet Orientation Courses.

Craig McDonald, Technical Director at ACS Aviation, commented: "At ACS Aviation, our primary goal is to equip our students with the latest and most advanced tools to best prepare them for successful careers as airline pilots. We are excited to introduce the new additions of the AL42 and the state-of-the-art ALX simulator to our training academy, confident that they will enhance the training experience for both our airline partners and student pilots alike."

Anna Lezoray, said: “We have been working with ACS Aviation since 2017, when they have bought their first AL42 device from ALSIM. We are extremely happy and thrilled to be part of their successful and impressive growth on the UK pilot training market. We look proudly at our fruitfull cooperation. Thank you to Craig, Graeme and the whole team for their continuous trust in ALSIM devices and services.”

Established in 2007, ACS Aviation has been training more than 1000 pilots and is the UK's leading Flight Training Organisation. ACS Aviation offers a range of flight training services at Perth Airport, along with onsite engineering and operation of the entire airfield. They also offer specialist aircraft maintenance services through their engineering division, ACS Engineering. ACS Aviation is a fully approved CAA Part CAO aircraft maintenance provider in Scotland, specialising in the support of fixed wing piston aircraft.
