BOEING DELIVERS FIJI AIRWAYS' FIRST 737 MAX AIRPLANE

News / Airlines, Manufacturer

Carrier begins modernization of single-aisle airplane fleet with the first of five 737 MAXs

Fiji Airways will be first airline in the Pacific Islands to fly the more fuel-efficient 737

Boeing [NYSE: BA] delivered the first 737 MAX for Fiji Airways, which plans to use the fuel-efficient, longer-range version of the popular 737 jet to expand and modernize its single-aisle fleet.

"We are thrilled to take delivery of our very first 737 MAX 8, named *Island of Kadavu*," said Andre Viljoen, Managing Director and CEO of Fiji Airways. "The introduction of the 737 MAX is the beginning of a new chapter for Fiji Airways and we look forward to taking advantage of the airplane's superior performance and economics. These new airplanes will enable us to offer a world-class customer experience through the new Boeing Sky Interior cabins with in-seat entertainment for all guests."

Fiji Airways plans to take delivery of five MAX 8 airplanes, which will build on the success of its fleet of Next-Generations 737s. The MAX incorporates the latest technology CFM International LEAP-1B engines, Advanced Technology winglets, and other airframe

enhancements to improve performance and reduce operating costs.

Compared to the previous 737 model, the MAX 8 can fly 600 nautical miles farther, while providing 14 percent better fuel efficiency. The MAX 8 can seat up to 178 passengers in a standard two-class configuration and fly 3,550 nautical miles (6,570 kilometers).

"We are delighted to welcome Fiji Airways to the MAX family of operators and we are thrilled they will be the first 737 MAX operator in the Pacific Islands," said Ihssane Mounir, senior vice president of Commercial Sales & Marketing for The Boeing Company. "We are honored by their continued partnership and confidence in Boeing products. The market-leading efficiency of the MAX will pay immediate dividends for Fiji Airways and will help them improve their operation and route network."

Based at Nadi International Airport, Fiji Airways serves 13 countries and 31 destinations/cities including Fiji, Australia, New Zealand, Samoa, Tonga, Tuvalu, Kiribati, Vanuatu and Solomon Islands (Oceania), the United States, Hong Kong, Japan and Singapore. It also has an extended network of 108 international destinations through its codeshare partners.

In addition to modernizing its fleet, Fiji Airways will use Boeing Global Services to enhance its operations. These services include Airplane Health Management, which generates real-time, predictive service alerts, and Software Distribution Tools, which empowers airlines to securely manage digital ground-based data and efficiently manage software parts.
