TECNAM DELIVERS FIRST US-BASED P2012 TRAVELLER WITH CONTINENTAL POWER TO PRIVATE OWNER

News / Business aviation, Manufacturer

Tecnam delivered the first US-based P2012 Traveller equipped with Continental engines to a private owner. Mr. Don Davis has selected the P2012 Traveller as the primary logistical and transport link for Spanish Cay, a private island destination in the Bahamas. This delivery marks a significant milestone for the P2012 program, showcasing the aircraft's versatility not just as a regional airliner, but as a versatile, safe, and premium platform for private mobility and essential utility operations.

Spanish Cay is a remote, privately owned island featuring a marina, resort, and residential properties. Accessible only by sea or via its private airfield (MYAX), the island relies entirely on external logistics for sustainability. The P2012 Traveller will serve as a vital lifeline, operating between the US mainland (Florida) and the island.

The aircraft's mission profile is diverse and demanding. It will be utilized to transport fresh food supplies and equipment necessary for the island's marina, restaurant, bar, and hotels. Additionally, the P2012 will provide premium comfortable transfer for guests and personnel, as well as serve as a rapid response vehicle for urgent transportation needs.

Don Davis, Owner of Spanish Cay, commented : "The P2012 Traveller Continental has proven to be the ideal solution for the Spanish Cay needs: it provides a flexible means of transportation allowing to fly in our guests and personnel, as well as all the vital supplies for the daily needs."

The selection of the P2012 Traveller highlights the aircraft's unique ability to handle short-haul, high-frequency operations with a large payload, all while offering twin engine safety, reliability and modern avionics required for over-water operations.

Francesco Sferra, Tecnam P2012 – Special Mission Platforms Sales & Business Development Manager, stated: "We are delighted to welcome Don to the Tecnam family. This delivery demonstrates that the P2012 Traveller is the perfect aircraft for private owners who require a reliable, safe, comfortable, high-capacity solution for their personal or business logistics. Connecting Florida to the Bahamas with the efficiency and safety of the P2012 Continental is a perfect example of what we call 'private mobility', giving owners the freedom to support complex operations with a single, versatile platform. Tecnam is planning to further widen the offer for private owners with a more varied choice of high-end interior configurations and finishings".
