TECNAM INTRODUCE THE P2006T TWIN MKII

News / Business aviation, Events / Festivals, Manufacturer

Tecnam unveiled at AERO Friedrichshafen today a major upgrade to its best- selling P2006T next-generation Twin.
With over 200 P2006T Twin's operating worldwide, it is already firmly established as the twin aircraft of choice by both leading Flight Training Organizations and private owners alike.
The P2006T Twin MkII offers unbeatable value, coupled with low operating and ownership costs, innovative design and Italian styling. The Rotax '912S' allows the Tecnam P2006T to lead with respect to the environment too. With both a remarkable fuel saving offering and much lower noise emissions, it has redefined both the flight training and aircraft ownership experience in one step.

The P2006T Twin MkII features a number of significant enhancements including the introduction of the **Garmin G1000 Nxi Next Generation Flight Deck** and improved levels of comfort for passengers and pilots alike.

Garmin's innovative G1000 Nxi state-of-the-art avionics platform features wireless cockpit connectivity, including wireless database updates using Garmin Flight Stream, enhanced situational awareness with 'SurfaceWatch', visual approaches,

Pilots will appreciate the G1000 Nxi's processing power that supports even faster map rendering and smoother panning throughout the displays. Garmin have focused on saving valuable time in the cockpit with the displays initializing within seconds after start-up, thereby providing immediate access to flight plan data and frequencies.

As a further safety enhancement Tecnam have now included the provision ADS-B OUT as standard on all P 2006T aircraft. Pilots in an ADS-B IN equipped cockpit have the ability to see, on

their flight display, other traffic operating in the airspace as well as access to clear and detailed weather information. They will also be able to receive pertinent updates ranging from temporary flight restrictions to runway closings.
Cabin upgrades include a new seat design, with electronic switches to control height and comfort and an improved lighting system featuring both ambient light and dimmer switches.

"*Be it major enhancements such as the introduction of Garmins state-of-the-art avionics suite or even down to the provision of ADS-B OUT and even USB sockets, Tecnam are committed to constantly evolving and improving its product offering, to ensure our customers always benefit in all the latest innovations in the GA world has to offe*r" said **Paolo Pascale, Tecnam's CEO**.

The Tecnam P2006T Twin Mk.11 will be available for delivery in May 2017.
