

RIYADH AIR TO LAUNCH WITH ALL-BOEING FLEET OF UP TO 72 787-9 DREAMLINERS

News / Airlines, Manufacturer

New Saudi Arabian carrier Riyadh Air has chosen Boeing 787 Dreamliner to power its global launch and support its goal of operating one of the most efficient and sustainable fleets in the world. Owned by Saudi Arabia's Public Investment Fund (PIF), Riyadh Air said it will purchase 39 highly efficient 787-9s, with options for an additional 33 787-9s. Based in the capital city, Riyadh Air will play a key role in growing Saudi Arabia's air transport network. This agreement is part of Saudi Arabia's wider strategic plan to transform the country into a global aviation hub.

Tony Douglas, CEO of Riyadh Air, commented: "The new airline reflects the ambitious vision of Saudi Arabia to be at the core of shaping the future of global air travel and be a true disrupter in terms of customer experience. Riyadh Air's commitment to its customers will see the integration of digital innovation and authentic Saudi hospitality to deliver a seamless travel experience. By positioning the airline as both a global connector and a vehicle to drive tourist and business travel to Saudi Arabia, our new 787-9 airplanes will serve as a foundation for our worldwide operations, as we build the wider network and connect our guests to Saudi Arabia and many destinations

around the world," Douglas said.

Stan Deal, president and CEO of Boeing Commercial Airplanes, said: "This is a significant order that will support Riyadh Air's commitment to deliver a world-class travel experience, while supporting American aerospace manufacturing jobs at Boeing and across our supply chain," said Stan Deal, president and CEO of Boeing Commercial Airplanes. "We are incredibly proud of our nearly eight decades of partnership to drive innovation and sustainable growth in Saudi Arabia's aviation sector. Our agreement builds on that longstanding partnership and will further expand access to safe and sustainable commercial air travel for decades more."

The 787-9 provides the longest range of the 787 family of airplanes, flying approximately 300 passengers 7,565 nautical miles (14,010 km), with additional cargo capacity. Passengers enjoy a better experience with the largest windows of any jet, air that is more humid and pressurized at a lower cabin altitude for greater comfort, large overhead bins with room for everyone's bag; soothing LED lighting, and technology that senses and counters turbulence for a smoother ride.

The 787 family is delivering unmatched fuel efficiency to airline operators around the world reducing fuel use and emissions by 25% compared to airplanes they replace.
