SHARJAH AVIATION SERVICES SELECTS CARGO FLASH MANAGEMENT SYSTEM

News / Airlines

Sharjah Aviation Services has selected **Cargo Flash** Info tech's Cargo Flash nGen-CMS as its warehouse and management suite, to be installed in the first half of 2016.

The handling agent at Sharjah International Airport says nGen-CMS will significantly improve processes and services and improve transparency. It says the management suite from Cargo Flash will provide real-time information about cargo flows and improve utilisation, while visibility and efficiency.

Sharjah Aviation Services general manager, Mohammed Al Zaghlawan says: "We selected Cargo Flash Infotech as our partner to install 'nGen-CMS' because it is the best product to meet our requirements. Cargo Flash Infotech brings not only the necessary experience but also an impressive track record within the industry in terms of quality and timely delivery."

Sharjah Aviation Services head of cargo, Gonzalo Jacob says: "'nGen-CMS' will boost our individual service offering to our clients and support us in handling our growing specialised cargo volumes as well as to deliver operational and trading excellence."

Cargo Flash Info tech chief executive officer, Rahim Bhimani says: "We welcome Sharjah Aviation Services (SAS) to Cargo Flash family and are excited to have formed this new partnership. We
