

ST AEROSPACE ACQUIRES REMAINING 50% OF S-PRO

News / Maintenance / Trainings

ST Aerospace Systems has acquired the remaining **50 per cent** stake in Singapore Precision Repair and Overhaul (**S-PRO**) from Messier-Bugatti-Dowty (a Safran company) for \$8.1m.

Following the acquisition, landing gear and components specialist S-PRO will become a wholly-owned subsidiary of ST Aerospace Systems, the aerospace arm of ST Engineering.

ST Aerospace said acquiring S-PRO aligns with its strategy to develop its Singapore base as a centre of excellence for landing gear MRO. Following confirmation of the deal, S-PRO has concurrently signed an agreement with Messier-Bugatti-Dowty to remain as an authorised service centre for landing gears installed on turboprops, and regional jets, as well as wheels, brakes and hydraulic components installed on various aircraft types.
