

TAP AIR PORTUGAL SELECTS NEW JFK TERMINAL 6 FOR FUTURE OPERATIONS

News / Airlines, Airports / Routes

JFK Millennium Partners, the company selected by the Port Authority of New York & New Jersey to build and operate John F. Kennedy International Airport's new world-class Terminal 6 and TAP Air Portugal, the national carrier of Portugal, today announced that TAP will make T6 its future home at JFK airport, joining codeshare partner JetBlue and Star Alliance airlines such as Air Canada, ANA, Avianca, Lufthansa and SWISS in the state-of-the-art terminal as part of its phase one opening in 2026.

TAP has served the New York market for over 50 years. It currently operates daily nonstop service from JFK to Lisbon using the state-of-the-art Airbus A330neo and A321neo aircraft. TAP's operations will continue normally until its planned move to T6 later in 2026. Other airlines that will operate from T6 include Austrian Airlines, Brussels Airlines, Cathay Pacific, Condor, Frontier, Icelandair, Kuwait Airways, and Norse.

Steve Thody, CEO, JFK Millennium Partners commented: "TAP Air Portugal's decision to join our T6 family reinforces our vision to create a world-class gateway that connects people and cultures across the globe. TAP's long-standing roots in the New York market have strengthened connectivity between the U.S. and Europe and align perfectly with our goal to deliver an innovative

and welcoming T6 guest experience."

Terminal 6 is a key component of the Port Authority of New York and New Jersey's \$19 billion transformation of JFK International Airport into a world-class gateway, with two new terminals, two expanded and modernized terminals, a new ground transportation center, and an entirely new, simplified roadway network.

TAP passengers can look forward to T6's digital-first, boutique guest experience, with a less than 5-minute average walk from the TSA security checkpoint exit to all gates. Additional features include extensive biometric-enabled, self-service bag drop facilities, 100,000 square feet of NYC-inspired shopping, dining, lounges and amenities, curated public art, sustainable operating features, and premium guest experience throughout the terminal.

Currently under construction at John F. Kennedy International Airport, Terminal 6 is being developed in two phases, with the first six gates opening in 2026 and construction completion expected by 2028. Terminal 6 features include:

- 10 gates, of which nine will accommodate widebody aircraft
- State-of-the-art automated baggage system, customs/border control facilities, and the latest TSA screening technologies
- One of the longest departures curbs at JFK, with airline-branded passenger drop-off zones
- Multiple airline lounges, in addition to a new arrivals lounge
- A new ground transportation center
- A curated collection of New York City-inspired artwork featuring local and international artists, curated by the Public Art Fund in partnership with JMP and the Port Authority of New York & New Jersey
- Sustainably sourced building materials, rooftop solar power, and energy efficient systems and operating practices throughout the terminal
- Sustainability certifications for LEED (silver or gold), Envision and SITES underway

30 MARCH 2026
