

[Thales TopSky – ATC](#) is an air traffic control automation solution designed to control en route, approach and oceanic traffic, both in civil and military environments. TopSky – ATC provides air traffic controllers and technicians with innovative and intuitive access to flight information, accurate real-time tracking for faster and better decisions, efficient tools for enhanced detection and resolution of conflicts, integrated sequencing and optimisation capabilities and a robust, reliable, easy-to-maintain system. ? ?

Cyril Einaudi, Vice President Global Turnkey segment, Thales, commented: “We would like to thank ZACL for their continued trust and are proud to be able to support them once again in improving air navigation safety by integrating two state-of-the-art functions into our TopSky – ATC system, which are perfectly suited to today’s needs. Together, Thales and ZACL are delivering the safer air travel of tomorrow.”

Over the years, Thales has become a major player in ATM in Africa, with 80% of the continent’s control centres equipped with TopSky – ATC. This solution is used by over 16,000 controllers worldwide. More than 80 Thales ATC radars are in service in Africa today.
