

EMIRATES TO ADD SABIHA GOKCEN AIRPORT TO ITS NETWORK

News / Airports / Routes

Emirates has announced its plans for a second gateway in Istanbul with the launch of a daily service to **Sabiha Gokcen Airport**, beginning December 15, 2015.

The new service complements Emirates' existing 11 weekly flights to Ataturk Airport, offering even more convenience for both inbound and outbound travellers.

Located on the Asian side of Istanbul, Sabiha Gokcen doesn't only offer a fresher travel experience, with shorter processing times, but also easier access to the city's new financial centre as well as to popular outlet malls and thermal spas in the vicinity. Passengers heading to the European side can also take advantage of regular coaches that operate between Sabiha Gokcen and Taksim Square every half hour, taking approximately 45 minutes.

"Istanbul has become an increasingly popular destination for Emirates, attracting both business and leisure travellers from around the world. By operating into two airports, we are enabling greater flexibility for our passengers, allowing them to fly into one airport and out of the other," commented Hubert Frach, divisional senior vice president, commercial – West at Emirates. "We will be the only airline operating a scheduled wide-body aircraft at Sabiha Gokcen Airport, a clear sign of our commitment to the market."
