

MOROCCAN AIRPORTS AUTHORITY (ONDA) PARTNERS WITH NATIONAL AVIATION SERVICES (NAS) TO BRING INNOVATION TO AIRPORTS IN MARRAKECH WITH E-GATES AT PEARL LOUNGE

News / Airports / Routes

First of its kind solution across Africa; E-gates offer quicker lounge access to passengers

The Moroccan Airports Authority (ONDA) partnered with National Aviation Services (NAS) (www.NAS.aero), the fastest growing aviation services provider in the emerging markets to launch the first electronic gates (E-gates) at the Pearl Lounge in the Marrakech Menara Airport departures area. This is the first of its kind solution across Africa.

With this new state-of-the-art, self-service check in, guests visiting the Pearl Lounge can access the lounge faster without checking in at the reception desk or waiting in a queue. The passengers simply scans their printed or online boarding pass at the gate and enter the lounge.

The E-gate effectively captures all the boarding pass data, checks eligibility, enters the transaction into a database for billing and reporting, and opens the gate for eligible passengers - all in less than 2 seconds. The E-gate also supports lounge membership

cards and vouchers.

The same technology will soon be adopted at other Pearl Lounges in Morocco as well as across other lounges in the NAS network.

NAS has been exclusively managing the refurbishment and operations of 16 lounges across nine airports in Morocco, following a ten-year concession awarded by the Moroccan Airports Authority (ONDA).

Hassan El-Houry, Group CEO of NAS said “As the exclusive lounge operator for the Moroccan Airports Authority (ONDA) in Morocco, NAS is responsible for bringing world class facilities and services to the local airports. Since kicking off operations in the country, we have invested in infrastructure, resources and training; provided operational expertise, state of the art technology solutions and industry benchmarked services, to launch and manage refurbished lounges across the country. The newly introduced E-gates will help enhance our offerings in the country and amplify our efforts to ensure that Moroccan airports supersede recognized international airports around the world.”

NAS is currently present in 17 countries across the Middle East, Asia and Africa; providing ground handling services to seven out of the world's top ten airlines and managing 31 airport lounges. With an expanded portfolio of aviation services and certified by IATA Safety Audit for Ground Operations (ISAGO), NAS also has demonstrated expertise in supporting local hub carriers in the Middle East and Africa.
