

BOMBARDIER ADVANCES SERVICES EXPANSION AS CONSTRUCTION OF LANDMARK ABU DHABI FACILITY ACCELERATES

News / Business aviation, Maintenance / Trainings, Manufacturer

Bombardier announced significant progress on its new state-of-the-art service centre at the Al Bateen Executive Airport (AZI). Construction has advanced, with the structural framework of the main building and hangar now rising. On track to open in the second half of 2026, this flagship facility represents a major milestone in Bombardier's strategy to expand its global customer service and support network and deliver world-class maintenance capabilities in the Middle East.

Paul Sislian, Executive Vice President, Bombardier Aftermarket Services and Strategy commented: "Seeing this flagship facility take shape is a powerful symbol of Bombardier's commitment to delivering world-class maintenance capabilities in the Middle East. At Bombardier, our priority is to be our customers' most trusted ally throughout their aviation journey. We strive to

make every service experience seamless, guided by care, convenience, and confidence. This new service centre stands as a powerful testament to that commitment—further reinforced by our #1 ranking in product support for two consecutive years.”

Spanning approximately 120,000 sq. ft., the new service centre will feature a 55,000 sq. ft. hangar, a dedicated parts depot, and a full suite of maintenance services—including scheduled and unscheduled heavy maintenance, aircraft modifications, and Aircraft on Ground support. The facility will accommodate Bombardier’s newest addition, the Global 8000, alongside the entire Learjet, Challenger, and Global families. Once operational in 2026, the facility will create approximately 100 highly skilled jobs in Abu Dhabi, further reinforcing Bombardier’s presence in this key financial hub and complementing its existing Dubai Line Maintenance Station.

This development in Abu Dhabi is part of Bombardier global strategy to strengthen its customer support footprint and deliver world-class service. It also aligns with Abu Dhabi Airports’ broader Al Bateen Executive Airport Masterplan, which aims to elevate the airport’s position as a premier hub for business aviation through enhanced infrastructure, advanced service capabilities, and world-class facilities.

Besides this development, Bombardier recently announced a large-scale, multi-phase U.S. expansion initiative, which kicked off this fall with the introduction of a new service facility in Fort Wayne, Indiana. Bombardier further unveiled the addition of a state-of-the-art paint shop at its London-Biggin Hill service centre. These investments underscore Bombardier’s commitment to providing comprehensive aftermarket solutions and enhancing convenience for customers worldwide.
