

BOMBARDIER CELEBRATES 200TH DELIVERY OF ITS CHALLENGER 3500 JET TO MR. PIERO FERRARI

News / Business aviation, Manufacturer

Bombardier delivered its 200th Challenger 3500 jet to Mr. Piero Ferrari, Vice Chairman of Ferrari. The aircraft will support Mr. Ferrari's travel to Formula One races and other business engagements, offering the performance, comfort and reliability required by a leader associated with excellence, precision and innovation. Reaching this milestone less than four years after entry into service underscores the aircraft's strong market momentum, growing customer demand and Bombardier's continued leadership in one of business aviation's most competitive categories.

David Murray, Executive Vice President, Manufacturing, IT and Bombardier Operational Excellence System commented: "Delivering the 200th Challenger 3500 jet is a defining milestone for Bombardier and a powerful testament to the aircraft's remarkable success in the super-midsize

segment. We are especially proud to mark this milestone with Mr. Piero Ferrari and thank him for the confidence he has placed in Bombardier. This achievement speaks to the exceptional dedication of our employees, the confidence our customers continue to place in Bombardier and the strength of an aircraft that delivers outstanding performance, impressive efficiency and an elevated cabin experience. The Challenger 3500 jet has quickly established itself as a category leader, and we look forward to building on that momentum.”

This reflects the strong market traction of the Challenger 3500 jet since its entry into service. Since its first full year of deliveries in 2023, the aircraft has outdelivered every other business jet model in the medium and heavy categories, underscoring its appeal among customers seeking a proven combination of performance, efficiency and cabin comfort. Challenger 3500 jet has quickly become one of the most sought-after aircraft in its category, offering the lowest direct operating costs in its class, leading performance, impressive versatility and a state-of-the-art cabin. Building on Bombardier’s long-standing leadership in the super-midsize segment, the aircraft continues a winning legacy defined by reliability, performance and customer-focused innovation.

Challenger 3500 jet has also continued to gain traction among leading fleet operators, further reinforcing its relevance with some of the industry’s most sophisticated buyers. Recent firm commitments from operators including BOND, NetJets and VistaJet highlight the aircraft’s growing adoption across a demanding customer base. Challenger 3500 jet features a thoughtfully designed cabin with several category-defining innovations, including the industry’s first voice-controlled cabin and the acclaimed Nuage seat, originally introduced on the Global 7500 aircraft. The aircraft also carries an Environmental Product Declaration, as does Bombardier’s entire portfolio of in-production aircraft, reinforcing Bombardier’s position as the only business jet manufacturer to have published EPDs for its aircraft.
