

CESSNA CITATION SOVEREIGN C680 JOINS TAG SPAIN AOC

News / Business aviation

TAG Aviation Spain is pleased to announce the addition of a Citation Sovereign C680 (EC-MLV) to its growing charter fleet, offering clients greater flexibility and cost-effective travel.

The Sovereign C680 is an impressive mid-sized state-of-the-art executive jet which provides a superior overall performance for short and medium range journeys. Capable of travelling 2,847 nautical miles, cruising at 527mph, the efficient and environmentally friendly jet represents the very latest technologically in business aviation. Boasting a long range and extremely quiet spacious cabin interior which has recently undergone a total refurbishment, the jet can comfortably accommodate up to 8 passengers and offers excellent load carrying capabilities. This aircraft can also use runways shorter than any other business jet of the same engine size, providing access to many airports that larger jets cannot reach.

“I am delighted to welcome the addition of the Sovereign C680 business jet to our expanding charter fleet which offers exciting new opportunities for TAG Spain” said Carlos Carasa Martin, Director of Flight Operations, TAG Aviation Spain. “Following the successful completion of the Spanish AOC we can now look to attract other Sovereign C680 aircraft owners with a view to manage their aircraft for charter when the aircraft is not in use by them. This has the additional attraction of allowing owners to generate income from their own aircraft and offset against their own running costs.”

TAG Aviation's tailored approach to streamlining private charters enables exacting solutions for every client. Customers interested in booking charters aboard the Sovereign C680 should contact TAG Aviation Spain for full details of availability and charter prices.
