

EXECUJET MRO SERVICES NEARS COMPLETION OF MAJOR DUBAI BUSINESS AVIATION FACILITY

News / Business aviation, Maintenance / Trainings

ExecuJet MRO Services is nearing completion of a new business aviation MRO centre able to house 18-24 business jets at one time. The facility was intentionally sized to handle the very largest business jets, including the Falcon 6X and 10X, as well as other large jets from other OEM's. Management expects to open the facility in the third quarter.

“The large hangar doors have been installed, an important milestone as it shows the construction phase is nearing completion,” says Nick Weber, Regional VP Middle East at ExecuJet MRO Services. “Dubai is a hub for so much global traffic that it merited a large investment in MRO capacity and expertise.”

The new 15,000m² (163,000ft²) MRO facility at Dubai's Al Maktoum International Airport (DWC) includes a hangar as well as adjacent workshops and offices. The new MRO facility will also become ExecuJet's new regional headquarters in Dubai.

The company will be moving base maintenance to DWC from Dubai International Airport (DXB), although it will retain AOG capability at DXB. ExecuJet commenced operations in Dubai more than 20 years ago and is approved to work on various aircraft types spanning several OEM platforms.

The company, which is a Dassault Aviation owned company, is a factory service centre for all in-production Dassault Falcon aircraft. It also provides line and base maintenance for Bombardier, Embraer Executive Jets and nearly all types of Hawker business jets.

ExecuJet MRO Services, a wholly owned subsidiary of Dassault Aviation, has world-class MRO facilities in Africa, Asia, Australasia, Europe and the Middle East; where major repair and refurbishment activities are conducted. All MRO operations performed within the global ExecuJet MRO Services network comply with the world's most stringent regulatory and safety requirements.?

Specialising in airframe, avionics and engine maintenance; aircraft engineers are factory trained and certified on a wide range of aircraft, including: Bombardier, Dassault, Embraer, Gulfstream, Hawker, and various others.
