

GOGO AVANCE L5 CERTIFIED ON A FULL COMPLEMENT OF GULFSTREAM AIRFRAMES

News / Business aviation

Quality inflight connectivity has become one of the most important features for passengers traveling on a business jet today. Gogo Business Aviation’s (NASDAQ: GOGO) [AVANCE L5](#) system is delivering a 4G experience to hundreds of business jets, including a full complement of Gulfstream aircraft models.

“We’re so pleased that Gulfstream has chosen to build on our partnership to invest in these STCs for the AVANCE L5 across multiple airframes,” said Sergio Aguirre, president of Gogo Business Aviation. “Gulfstream has a discerning customer base, and the AVANCE L5 system delivers the most robust air-to-ground experience available across North America today. It’s great news that the L5 is now available as an install option.”

The Supplemental Type Certificates (STCs) secured include the following Gulfstream airframes:

- G650/650ER
- G600
- G550/GV/SP

- G450/GIV/SP
- G280

Gogo AVANCE is an innovative software-centric approach that combines Gogo's advanced hardware and software technology to create a fully integrated, aviation-grade inflight connectivity and entertainment platform. The platform enables connected aviation technologies, services and applications like never before. AVANCE L5 connects to the Gogo Biz 4G network delivering faster speeds supporting bandwidth-intensive activities.

AVANCE L5 is flying on nearly 500 aircraft today providing a 4G in-cabin connectivity experience that is proven and dependable.

The Gulfstream service centers offering AVANCE L5 installations include locations in Savannah and Brunswick, Ga., Westfield, Mass., St. Louis, Mo., Dallas, Texas, Long Beach, Calif., and Appleton, Wis.
