

GULFSTREAM APPOINTED MJETS AS INTERNATIONAL SALES REPRESENTATIVE FOR THAILAND

News / Business aviation, Manufacturer

Gulfstream Aerospace Corp. appointed MJets Limited as the authorized international sales representative for Gulfstream business aircraft sales activities in Thailand. Under the agreement, MJets will be responsible for promoting and supporting Gulfstream with customers and prospects throughout the country. Gulfstream continues to see significant growth in Asia, particularly with its newest aircraft models, the Gulfstream G700 and G800, as operators look for a quality aircraft with the performance, comfort, speed and range required to travel to farther destinations faster. Several G700 aircraft have already been delivered to the region with the first G800 aircraft coming in 2026.

Michael Swift, group vice president of international sales, Gulfstream commented: “As we continue to see business aviation grow throughout Asia, we are looking forward to leveraging MJets’ local expertise to provide customers and prospects the opportunity to experience the high quality and craftsmanship of Gulfstream aircraft firsthand. MJets is a well-respected member of the business aviation community and was an ideal partner choice given their strong customer relationships and

shared commitment to excellence.”

William E. Heinecke stated: “As the official authorized sales representative in Thailand, we are honored to serve as a direct bridge between Thai owners and one of the most respected aircraft manufacturers in the world.”

Kirit Shah said: “This appointment allows us to bring Gulfstream’s vision, performance and craftsmanship closer to our customers — supported by local expertise, long-term operational understanding and a shared standard of excellence.”

This collaboration is guided by a shared vision among MJets’ founders. MJets provides aircraft sales, management and fixed-based operator (FBO) services, including Thailand’s first business jet terminal at Bangkok’s Don Mueang International Airport, to private aircraft owners. The company also operates the first Gulfstream G700 aircraft to deliver in Thailand.
