

HONDAJET ELITE II MADE ITS PUBLIC DEBUT AT EBACE 2023

News / Business aviation, Manufacturer

HondaJet Elite II debuted at EBACE 2023. With a range of up to 1,547 nautical miles, the Elite II bolsters the HondaJet's position as the most fuel-efficient jet, flying farther than any other aircraft in its class and with lower carbon emissions. Honda Aircraft Company continues to demonstrate its long-standing commitment to the environment and sustainable aviation practices with the latest HondaJet Elite II.

Honda Aircraft President & CEO Hideto Yamasaki, commented: "Debuting our latest aircraft at EBACE marks an important milestone for everyone at Honda Aircraft Company, demonstrating our unwavering commitment to excellence. The HondaJet Elite II continues our dedication to exceeding the expectations of customers worldwide by setting new standards in performance, efficiency and comfort for the future of very light jets."

The HondaJet Elite II has received type certification from the U.S. Federal Aviation Administration (FAA) and is expecting the European Union Aviation Safety Agency (EASA) type certification soon. The global fleet of HondaJet has exceeded 170,000 flight hours and grown to 230 aircraft worldwide. In Europe, there are currently 20 HondaJet in operation. To further support its

customers in the region, Honda Aircraft Company has doubled its authorized service center in Europe and added a flight training center in Farnborough.

Honda Aircraft Company is utilizing the Sustainable Aviation Fuel Book and Claim Program for its ferry flights to and from EBACE to promote the deployment of SAF and support the industry's commitment to carbon neutrality.
