

JET AVIATION ADDS 22 AIRCRAFT TO ITS US AIRCRAFT MANAGEMENT AND CHARTER FLEET

News / Business aviation

Jet Aviation has added 22 aircraft to its US aircraft management and charter fleet, of which 10 are available for charter. The latest additions grow Jet Aviation’s US managed fleet and charter offerings under the company’s Part 91, Part 125 and Part 135 certificates. Jet Aviation has expanded its US managed and charter fleet adding 22 aircraft, 10 of which are available for charter under the company’s Part 135 certificate. The additions grow Jet Aviation’s diverse fleet of US aircraft, spanning from mid-size to large cabin, long-range and ultra-long range business jets.

David Dalpiaz, vice president flight services in the Americas commented: “We are proud to see continuous momentum in our managed fleet and charter offerings. We are committed to providing our customers with fully tailored, comprehensive management solutions that meet their specific needs. The ongoing growth of our fleet is a testament to the trust our customers are placing in us, and we are honored to be their partner of choice. As a fully integrated business aviation partner, we offer services and solutions that touch every stage of aircraft ownership and charter, and we

are committed to ensuring an effortless experience.”

Leslie Cheshier, vice president of owner and charter services stated: “With each new addition to our Part 135 certificate, we are strengthening our ability to deliver our charter customers an expansive scope of choices to meet their needs. From mid-size to ultra-long-range, we are pleased to introduce new offerings that service our customers wherever and whenever they need us. Alongside our existing fleet, these new additions ensure that we continue to offer our customers choices that fit their travel needs.”

Jet Aviation aircraft management provides comprehensive solutions and personalized programs with a range of services, including fueling, flight planning, maintenance management, operational support, crew recruitment, and charter partnership. Its charter offerings provide a global fleet of hand-picked aircraft available for on-demand requests.
