

JET AVIATION DUBAI RECEIVES GCAA APPROVAL FOR A320 SERIES AIRCRAFT

News / Business aviation

Jet Aviation Dubai has been approved by the General Civil Aviation Authority (GCAA) in the United Arab Emirates (UAE) to support Airbus A320 series aircraft. The company already holds Federal Aviation Administration (FAA) approval and is currently working to secure European Aviation Safety Agency (EASA) approval.

This GCAA approval authorizes Jet Aviation Dubai to support all Airbus A320 series aircraft registered in the UAE with line and base maintenance.

“Large Airbus Corporate Jets (ACJs) are very popular in the Middle East and we’re pleased to extend our support to these heavy iron aircraft, many of which we’re proud to note were completed at our Basel Completions Center,” says Hardy Butschi, vice president and general manager of Jet Aviation Dubai. “This approval strengthens our ability to provide quality maintenance support to the popular Airbus A320 corporate jet variants.”
