

JETEX ANNOUNCED AS THE EXCLUSIVE OPERATOR OF RED SEA INTERNATIONAL AIRPORT'S PRIVATE JET TERMINAL

News / Airports / Routes, Business aviation

Red Sea Global, the developer behind regenerative tourism destinations The Red Sea and AMAALA, has celebrated a landmark aviation agreement. The new partnership will see Jetex operate the private aviation terminal at Red Sea International Airport. The collaboration was formalized through an agreement between Jetex and daa International, the operator of RSI, marking a new chapter in exceptional luxury aviation experience on Saudi Arabia's western coast.

John Pagano, Group CEO of Red Sea Global commented: "With RSI, we were determined to create an airport that seamlessly blends beautiful design, exceptional experiences and a commitment to honoring nature. Soon, every passenger transiting through our airport will experience this firsthand. With Jetex onboard, guests using our private aviation terminal will also experience elevated levels of service that reflects the very best of The Red Sea destination."

Adel Mardini, Founder and CEO of Jetex, stated: "Jetex is excited to embark on its first major venture in Saudi Arabia through the innovative Red Sea International Airport, a pioneering project

in sustainable tourism. In collaboration with both daa International and Red Sea Global, we aim to transform the airport into a top-tier destination that resonates with the most discerning international and domestic travelers.

Michael White, Chief Commercial Officer of RSI, said: “By partnering with Jetex, we reaffirm our service promise to the world. Together, we will pioneer new global standards in private aviation, consistent with the unparalleled service quality of The Red Sea destination. We look forward to welcoming guests to the private aviation terminal and showcasing its unique design and service.”

RSI main terminal, set to open fully next year, is designed with five independent ‘mini terminals’ arranged as a series of pods. One of these ‘mini terminals’, is reserved for private aviation and will be operated exclusively by Jetex.

Dubai-based Jetex was selected as the fixed base operator of RSI following a competitive tender process. This is Jetex’s first significant venture into the Saudi market and the agreement will see Jetex first fit-out the private aviation terminal. Jetex’s service offering will cover all aspects of private jet handling including managing the private terminal, aircraft turnarounds, concierge services and luxury electric airport transfers in line with the destination’s sustainability priorities. With a global reputation for excellence in executive aviation, Jetex brings unparalleled expertise in private terminal operations, aircraft fueling, and ground handling to The Red Sea destination.

Last year, The Red Sea welcomed its first guests, with four of its hotels now open and Desert Rock expecting its first guests later this month. RSI has been receiving a regular schedule of domestic flights since September 2023 and international flights began in April 2024, with a twice-weekly route between The Red Sea and Dubai International. The airport is strategically located, situated within three hours flying time of 250 million people and eight hours flying time for 85% of the world’s population.
