MILANO PRIME 2019 TRAFFIC GROWTH NUMBERS ARE MORE THAN IMPRESSIVE

News / Airports / Routes, Business aviation

Business&General Aviation traffic in Milan in December in the two airports managed by Milano Prime – Linate Prime and Malpensa Prime - registered an overall growth of 19.4%. The growth was 16.8% in Linate and 34.8% in Malpensa. This result is particularly significant in comparison to the average increase of European B&GA airports of 2.9%.

In the year 2019 the opening of the new Milano Prime terminal at Malpensa last July generated an increase in Business&General Aviation flights of 85.5%. This figure includes approximately 5,300 movements which, during the three-month closure of Linate airport, were re-protected in the new Malpensa GAT.

In 2019, 24,500 B&GA movements were managed at Milano Prime airports, with an average of ca. 70 movements per day, confirming Milano Prime's fifth place in Europe.

New VVIP service
