SHY AVIATION LAUNCHES "FLY" APP

News / Business aviation

Phase one of brand new app – fly., has now launched and is available to download. Creative Director Jeremy Jones said, “SHY wanted to create an App that would act as a support to our global offices, existing clientele and reach out to new audiences. It is a platform we look forward to developing even further over the next few years”.

Fly. provides clients with access to our global network of private aircraft directly from their iPhone or iPad. In just a few seconds you can have a price estimation for your charter and

even virtually map the route.

The App allows you to search and select empty legs, one way and round trip options. Choose the nearest airport to you, which can be automatically generated from your mobile location settings, select type of aircraft and add passengers.

SHY's global team are available 24/7 – you can speak direct to an expert broker from any of our offices at any time of day, 365 days a year. Whether you make your request to SHY with one simple call, SMS, WhatsApp, email or using the App you will have access to every available aircraft worldwide.
