

SKYDRIVE ENTERS INTO A BUSINESS PARTNERSHIP WITH AEROGULF SERVICES, RECEIVING A PRE-ORDER FOR 50 EVTOL AIRCRAFT

News / Business aviation, Manufacturer

SkyDrive and AeroGulf Services have signed a Letter of Intent for the purchase of up to 50 SKYDRIVE eVTOL aircraft. The partnership will focus on exploring revolutionary air mobility business opportunities at Dubai's iconic tourist destination, Palm Jumeirah. Through this business partnership, SkyDrive and AeroGulf Services will work together to explore potential flight routes and practical use cases for commercial eVTOL operations, with a focus on providing sightseeing services and touristic flights at Dubai's renowned tourist destination, Palm Jumeirah.

AeroGulf Services, Dubai's first commercial helicopter operator, provides a wide variety of aviation services, including helicopter charters, oil field transportation, filming, and emergency medical services. The company also aims to explore the future business opportunities in the tourism sector using environmentally friendly eVTOL aircraft that are fully electric and emit no CO2 in operation. The compact and three-seater "SKYDRIVE" is ideal and perfectly suited for their future business model, which came to the agreement of pre-order up to 50 units.

Tomohiro Fukuzawa, CEO of SkyDrive commented: "We have been working on market expansion in the US and Asia so far, and this collaboration with AeroGulf Services marks our first entry into

the Middle Eastern market — a major milestone in bringing our eVTOL business vision to life. AeroGulf Services is the oldest commercial helicopter operator in Dubai, with maintenance expertise that is utilized by the government of the United Arab Emirates. As a company that prioritizes safety and security above all, we consider AeroGulf Services to be the ideal partner for our operations in Dubai. Dubai is at the forefront of preparing for the operation of eVTOL, and it attracts not only residents but also tourists and business travelers from around the world. In collaboration with AeroGulf Services, we aim to introduce sightseeing flights using our compact “SKYDRIVE” eVTOL aircraft, initially around the iconic artificial island of Palm Jumeirah. By offering many people first-hand experiences with our eVTOL, we hope to showcase its value and utility, bringing this groundbreaking form of transportation to a global audience.”

Fahad Mohammad Mir Hashem Khoory, CEO of AeroGulf Services stated: “We are thrilled to partner with SkyDrive to bring the future of aviation to Dubai. Our commitment to sustainability and innovation is in perfect harmony with Dubai’s vision for a greener future. With eVTOL technology, we are taking a bold step towards transforming urban mobility while maintaining our dedication to safety, efficiency, and exceptional service. Through this collaboration, AeroGulf Services and SkyDrive will establish a new benchmark for eco-friendly air travel in the region, offering seamless and sustainable aerial experiences for both residents and visitors. The deployment of eVTOL aircraft will not only reduce carbon emissions but also enhance connectivity and accessibility across Dubai’s key destinations.”
