

SPARFELL WELCOMES A NEW CHALLENGER 300 TO ITS FLEET

News / Business aviation

If we say that since February 2020 air travel is not like it was before, would you agree? Post pandemic air travel is still a challenge. So for many corporate and private travellers business aviation is the solutions they are choosing. Speed, safety, reliability and quality of services.

Demonstrating SPARFELL dynamism, the aviation group welcomes the 5th aircraft in 2021, a Challenger 300, to its fleet of managed aircraft on its Austrian AOC, increasing the SPARFELL Luftfahrt GmbH fleet of Challenger 300 / 350s to six aircraft.

This beautiful aircraft is available for charter and impresses with its brand-new and comfortable interior to be enjoyed by up to 9 passengers, whether for business or leisure.

The Challenger 300 joins a large and diverse SPARFELL fleet with AOCs and offices in Geneva, Vienna, San Marino, and Paris, which includes light-jets (Phenom 100), mid-size jets (Praetor 600) to ultra-long-range jets (Gulfstream 650ER).
