

UAM SERVICES TO SYDNEY WITH AN INITIAL ORDER OF 50 EVTOLS - EVE AND SYDNEY SEAPLANES

News / Business aviation, Manufacturer

Eve Urban Air Mobility Solutions and Sydney Seaplanes partnered to lay the foundation for new electric air taxi operations in Greater Sydney. With the partnership, Sydney Seaplanes has placed an order for 50 of Eve's electric vertical takeoff and landing aircraft (eVTOL), with progressive deliveries expected to commence from 2026. The new partnership accelerates the progress towards 100% of greater Sydney's local tourism and commuter flights coming from zero emission electric aviation.

“This is an exciting development for Sydney Seaplanes. Sydney needs a post-COVID lift and what better way to do that than by developing high-tech and zero carbon jobs that support transport, tourism and the vibrancy of this wonderful city. Eve’s eVTOL technology will integrate seamlessly with our electric amphibious fleet to deliver a range of tourism and commuter journeys. Subject to community consultation, we expect some flights will operate from our iconic Rose Bay aviation terminal in Sydney Harbour. This service will have widespread appeal which will allow us to open new routes beyond the Harbour and throughout the greater Sydney region,” said Aaron Shaw, CEO of Sydney Seaplanes.

“We are pleased to support Sydney Seaplanes as they seek to bring new mobility solutions to Sydney. The Greater Sydney market offers significant potential for scaled Urban Air Mobility operations, to make the most of the iconic beauty of Sydney Harbour and to improve the efficiency of movement to complement existing transport modes. Eve will support this new partnership with comprehensive solutions for aircraft operations including air traffic management solutions, maintenance, training, and other services,” said Andre Stein, President & CEO of Eve Urban Air Mobility.

Benefitting from a startup mindset and backed by Embraer’s more than 50-year history of aircraft manufacturing and certification expertise, Eve unveils a unique value proposition by positioning itself as an ecosystem partner by offering a suite of products and services with the highest levels of safety standards. Eve’s human-centered, eVTOL design combines disruptive innovation and a simple and intuitive design. In addition to the aircraft program, Eve is harnessing the expertise of both Embraer and Atech, a subsidiary of the Embraer Group, in providing globally recognized air traffic management software to create the solutions that will help safely scale the UAM industry going forward.
