WESTON AVIATION CELEBRATES 7 YEARS AT ITS YORKSHIRE GATEWAY AT HUMBERSIDE AIRPORT

News / Airports / Routes, Business aviation

Weston Aviation the UK and Ireland based business aviation and FBO specialist has announced continuous year on year growth of ad-hoc aircraft activity at Humberside International Airport. From opening at the airport in 2011 where there was previously no formal FBO facility at the airport, Weston Aviation has increased business aviation and cargo movements by 212%.

Commenting on the results, CEO and founder Nick Weston said “The significant increases in private and cargo aircraft movements that we have developed since we commenced operations at Humberside Airport clearly demonstrates the results and growth that can be achieved by a specialist FBO and development company like Weston Aviation operating at a regional airport”.

Humberside International Airport, located on the east coast of the UK is an ideal location for offshore operations, military training and transit flights and business aircraft and is conveniently located for quick access to North Lincolnshire, Yorkshire and Nottinghamshire.
