

WORLD'S LONGEST RANGE BUSINESS JET FLIGHT IN HISTORY - BOMBARDIER GLOBAL 7500

News / Business aviation, Manufacturer

Do you think a 8,152 nm flight is possible? Do you think it. is even. possible? Is it the longest mission ever flown? The answer is yes, to all these questions. Highest speed over longest distance in business aviation history ? again, the answer is Bombardier Global 7500.

Amazing flight connecting Singapore to Tucson, AZ, with an aircraft providing industry's largest cabin and best cabin experience, ment for trans-oceanic journeys. If you have questions regarding fuel, be sure, there are 4,300 lb of remaining fuel represents nearly 1,5 hours of additional flight.

?Bombardier announced that *Global 7500* aircraft, has once again demonstrated its ability to go the distance by completing the longest range business jet flight in history**, successfully completing an 8,152-nautical-mile flight non-stop, pushing the boundaries of business travel.

The award-winning business jet departed from Singapore Changi Airport at 7:12 a.m. local time and arrived at Tucson International Airport at 8:19 a.m. local time, completing the long-range

speed record flight for the city-pair.

“The *Global 7500* aircraft was built to break all the records,” said David Coleal, President, Bombardier Business Aircraft. “It achieved the industry’s longest mission ever in business aviation after only two months in service. We’ve demonstrated its unequaled long-range and high speed capabilities, but also its ability to break records confidently with healthy fuel reserves remaining, once again, confirming its unsurpassed performance to customers.”

Since its entry-into-service, the *Global 7500* jet has emphatically proven itself to be the highest-performing aircraft in the industry and this record showcases the real-world capabilities of this impressive aircraft. With a top speed of Mach 0.925, the aircraft has unquestionably shown its ability to fly even further than any other business jet with its advertised range of 7,700 nautical miles. The achievement of a flight that reaches 8,152 nautical miles clearly demonstrates that the aircraft is the only business jet with the high-performance capabilities required for long flights. Providing access to these demanding, long-range routes is an invaluable resource for customers.

Over the last two months, the *Global 7500* jet has demonstrated exceptional performance and reliability, this first aircraft has completed more than 170 hours of flight around the world.

The *Global 7500* aircraft offers spaciousness that is unique among business jets, with its award-winning interior featuring a full-size kitchen and four true living spaces. The *Global 7500* aircraft also debuts Bombardier’s patented *Nuage* seat, which was meticulously designed for maximum comfort and will be exclusive to the new *Global* family of aircraft.
