“We are continuously discovering new ways to deliver the vertical flight to the masses and Bell's Urban Air Taxi is the first step,” said Michael Thacker, executive vice president, technology and innovation. “Changing the landscape of the vertical lift industry has been our objective from the start and we are excited to push the limits of VTOL as we change the way the world flies.”

The Bell 525 Relentless program continues to advance forward and receive interest from customers around the world. This cutting-edge aircraft integrates Fly-By-Wire technology providing unparalleled crew situational awareness and expand mission capabilities.

The Bell 505 Jet Ranger X will be also be on display in the Bell booth. The aircraft is making waves around the world, specifically in the Asia – Pacific market with the region's first delivery to Nautilus Aviation and new orders from Vietnam Helicopter Corporation and SECO International in Japan.
