

NEW LEARJET 75 LIBERTY FULL INTERIOR MOCK-UP AND MUCH MORE FROM BOMBARDIER

News / Business aviation, Events / Festivals, Manufacturer

Business aviation industry is getting ready to NBAA-BACE Convention & Exhibition to present latest achievements, discuss most important trends of the industry.

So what we can expect from Bombardier this year? First thing not to be missed - the newest member of the *Learjet* family, the *Learjet 75 Liberty*, with a full-size interior mock-up! “This mock-up will truly show light jet customers just how spacious and comfortable our newest *Learjet* is,” said Peter Likoray, Senior Vice President, Worldwide Sales and Marketing, Bombardier Business Aircraft. “The *Learjet 75 Liberty* offers a larger cabin and superior performance for the same price as competitors, and it’s certified to a higher safety standard.”

The full-size interior of the *Learjet 75 Liberty* at Bombardier’s static display at NBAA-BACE will give visitors a unique opportunity to experience the features that set this light jet apart. Customers attending NBAA-BACE will also be eligible for promotional launch offers on the *Learjet 75 Liberty*.

The *Learjet 75 Liberty* debuts the segment's first Executive Suite, a spacious area at the front of the cabin with two forward-facing seats and an unprecedented three feet (0.91 metres) of legroom for the light jet category. Passengers can stretch out on oversized ottomans that are easily stowable, and open up their laptops on large, retractable side tables. Located behind a standard forward pocket door, the Executive Suite is a quiet haven for busy executives.

Visitors to the *Learjet 75 Liberty* mock-up can also experience class-leading legroom in the Club Suite, with a four-seat configuration, large side tables and plenty of storage.

The latest member of the iconic *Learjet* family was unveiled earlier this summer and is generating strong interest on the market. It is expected to enter service in 2020.

The *Learjet 75 Liberty* is the fastest aircraft in the light jet segment with a top speed of Mach 0.81. Its range of 2,080 nautical miles can connect Las Vegas to New York, Seattle to Washington, D.C., and Mexico City to San Francisco, nonstop.* This superior performance comes at the same operating costs as competitor aircraft that offer less.

The *Learjet 75 Liberty* is certified to the highest safety standards applicable to commercial airliners, unlike most competitors in the light jet category that are certified to less stringent safety standards. *Learjet* aircraft offer impressive handling characteristics and outstanding performance. The *Learjet 75 Liberty* features the advanced *Bombardier Vision* flight deck, and includes the recently announced Garmin G5000 avionics upgrade.

Bombardier is proud to be participating at NBAA-BACE, where it will also showcase its flagship *Global 7500* aircraft, the newly-certified *Global 6500* aircraft, as well as the class-leading *Challenger 350* and *Challenger 650* aircraft.
