

QATAR EXECUTIVE EXHIBITING ITS NEW GULFSTREAM G650ER AT ABU DHABI AIR EXPO

News / Business aviation, Events / Festivals

Qatar Executive is exhibiting at the Abu Dhabi Air Expo this week.

Qatar Executive will be participating with an exclusive, dedicated chalet and will be showcasing its brand new Gulfstream G650ER on static display, giving visitors the opportunity to see the luxurious interior of the world's fastest ultra-long range business jet, which is highly sought-after among the global travelling elite due to its phenomenal range capabilities, industry leading cabin technology and unparalleled passenger comforts.

Qatar Executive's G650ER aircraft can easily fly non-stop from the Middle East to North America or from destinations in Asia to Africa – further, faster than any other jet of its kind – and is perfectly suited for those whose travel needs include flights halfway around the globe.

Qatar Airways Group chief executive, Akbar Al Baker said: "Qatar Executive demands nothing less than the best for its discerning clientele and the G650ER, as the technologically most advanced business jet available in the market, enables us to offer a superior product to our valued customers.

“Since we welcomed our new Gulfstream G650ER into our dynamic private fleet, we have received an outstanding market response, as the aircraft meets all requirements of VIPs and world leaders in terms of range, flexibility and performance.”
