

AIR SUPPORT CELEBRATES ITS 30TH ANNIVERSARY AND CONFIRMS A STRONG RECOVERY

News / Maintenance / Trainings

Air Support, a partner of choice for aircraft component MRO, mainly for engine, cabin and lighting components, is celebrating its 30 years anniversary for this month. Established in 1992, the Gers-based company, with now 150 associates headed by Sabine Terte, targets to hit revenues worth of €30M for 2022-2023.

Moving forward

Following the impact of the health crisis, Air Support show resilience by investing in new industrial resources. With the help of the France Recovery Plan, they engineered a new fuel test bench destined to test current and new-generation fuel pumps (CF34, CFM56, LEAP and GEnX). Air

Support have also invested in a new ERP system that will help digitalize entire corporate processes (paperless plant).

With the steep recovery since early 2022, corporate is now exceeding pre-Covid workload. To support growth, Air Support plan to invest in a brand new positive-energy building!

At Air Support they deeply believe that CSR approach provides a real opportunity to come up with a company project along with all its stakeholders. *"It is important to see CSR in an overall approach for industrial performance so as to maintain the Stand Firm and keep conform with the qualities we value for 30 years: ambition, passion, cohesion and excellence. Our commitment deals with real actions to set ourselves challenging goals for a sustainable world,"* says CEO Sabine Tertre.

One goal: act as forward-looking responsible player!

Air Support is a partner of choice for aircraft component MRO (Maintenance Repair and Overhaul), mainly for engine, cabin and lighting components. In addition, Air Support offers on-site Technical Assistance for in customers in France or abroad. Located in Pujaudran (Gers) since 2013 and managed by Sabine TERTRE, Air Support targets to hit revenues worth of €30M for 2022-2023. With 150 employees and 200 customers across 40 countries, Air Support is a reliable partner that supports the main actors of the aerospace industry.
