

AIRWAYS AVIATION - NEW SIMULATOR CENTRE OPENING

News / Maintenance / Trainings

A significant milestone in the continued expansion of world-class pilot training facilities - Airways Aviation celebrated the opening of its new simulator centre at the Gold Coast Airport. The event saw a full house with attendees including key industry partners, academic collaborators from Ansett Aviation Training, Griffith University, Southern Cross University and representatives from Study Gold Coast. The presence of such distinguished attendees emphasised the strong community and educational ties supporting aviation education and training globally, as well as the growth of the pool of aviation professionals and expertise in Australia, particularly in the Southern Queensland and Northern Rivers NSW regions.

Romy Hawatt - Founder & Chairman - Airways Aviation Group commented: "We selected the AL250 simulator from ALSIM Flight Training Solutions due to its long-established pedigree, quality, and functionality including the fact that this particular Simulator also eliminates the need for our Australian Academies to operate multiple devices. This aligns with the Airways Aviation ethos of providing the most efficient and cost effective aviation education and training solutions."

Janet Dalby - CEO Airways Aviation - Australasia Pacific Region said: "Moreover, the opening of this simulator centre is a testament to Airways Aviation's robust international growth, particularly in the MENASA and Southeast Asian territories and will further enhance the capabilities of the Gold Coast and Lismore campuses to attract both domestic and international students."

For over two decades, Airways Aviation has partnered with ALSIM, the renowned flight simulator manufacturer, to support our first-class training solutions. The new centre features the milestone 100th ALSIM AL250 simulator, an advanced training tool designed to meet the needs of prospective commercial pilots in the initial stages of their career, covering PPL, CPL and IR/ME courses. This versatile simulator offers reconfigurable SEP/MEP capabilities and a switchable classic to glass cockpit, ensuring a comprehensive and immersive training experience.

The launch event also served as a platform to reaffirm Airways Aviation's support for the Griffith Aviation MATES program, an initiative that fosters mentorship and development among aviation students. The presence of program leaders and members at the event underscored the collaborative spirit that defines the aviation community on the Gold Coast.

As a proud member of Study Gold Coast, Airways Aviation is thrilled to contribute to the region's reputation as a premier destination for aviation education. This new facility not only represents a significant investment in local infrastructure but also reaffirms Airways Aviation's commitment to fostering educational excellence and industry readiness among its students.
