

DEER JET REPAIR CERTIFICATE AND PROTECTION PLANS TO BENEFIT USERS

News / Business aviation, Events / Festivals, Maintenance / Trainings

Deer Jet has accomplished FAA annual tests on continuous updated maintenance procedures and regulations, gaining the company a FAA repair station approval. The certificate makes of the company one of only 45 Part 145 repair stations registered in Mainland China authorized to perform maintenance on U.S.-registered aircraft (N-number).

As the largest business aviation company in Asia, Deer Jet has built one of the most comprehensive supply chains and extensive service networks for private jet owners to enjoy world-class solutions. The company's maintenance facilities are located in main business hubs including Beijing, Shanghai, Shenzhen, and Hong Kong.

Deer Jet has signed many agreements with main manufacturers and jet maintenance solution firms, and established service and repair centres including Dassault Falcon, Tronair and Honeywell APU. Also, the company's AOG centres can perform maintenance and repair works on a diversity of aircraft types and are authorized distributors of original parts.

Deer Jet's success in winning maintenance and service contracts from renowned manufacturers comes from its state-of-the-art maintenance facilities and highly trained personnel, able to provide 24/7 support to the ever growing volume of traffic of private jets

coming to China.
